herdr cheatsheet

prefix = `Ctrl+b` · plugins: Navigator, reviewr, herdr-nvim

In-app help: `prefix+?` herdr · `?` Navigator · `?` reviewr

Review loop

1. Start: `claude --worktree <name>` 2. Find an agent: `prefix+t` then `a` and type, or `@idle` 3. Review: `prefix+d`, then `t` for the last turn 4. Comment: `v` select, `c` comment, repeat
5. Send: `s`, then press Enter in the agent 6. Fix it yourself: `e` opens Neovim at the line

Plugin keys

custom

`prefix+t`	Navigator: jump to anything
`prefix+d`	reviewr: toggle the diff review pane
`prefix+f`	herdr-nvim: open a file the agent touched
`prefix+shift+e`	herdr-nvim: toggle the Neovim sidebar
`Ctrl` + `click`	a file path in agent output opens it in the sidebar

Navigator side pane and jump-back have no key; see CLI below.

herdr-nvim (herdr side)

`prefix+shift+e`	sidebar: one persistent Neovim per tab
`prefix+f`	picker: agent-touched files first; type to search the repo
`Enter`	open the file in the sidebar at the line

Comment keys inside Neovim: `<Space>hc` `hs` `hS` `hl` `hi` (see the Neovim sheet).

DAEMON CLI

Binary: `~/.local/share/herdr-nvim/bin/herdr-nvim`

`daemons` — list per-tab Neovims, RAM, unsaved work

`daemons stop <tab>` — stop one (`--force` drops unsaved)

`daemons stop --orphans` — stop daemons whose tab is gone

`doctor` — live health checks

herdr core

defaults

`prefix+?`	keybinding help
`prefix+s`	settings
`prefix+g`	go to any agent/terminal (`/` search, `j` `k`)
`prefix+w`	workspace navigation
`prefix+b`	toggle sidebar
`prefix+o`	focus notification target

WORKSPACES AND TABS

`prefix+shift+n`	new workspace
`prefix+shift+g`	new git worktree
`prefix+shift+w`	rename workspace
`prefix+shift+d`	close workspace
`prefix+c`	new tab
`prefix+n` / `prefix+p`	next / previous tab
`prefix+1…9`	switch to tab
`prefix+shift+t`	rename tab
`prefix+shift+x`	close tab

PANES

`prefix+v` / `prefix+minus`	split vertical / horizontal
`prefix+h/j/k/l`	focus pane
`prefix+shift+h`	swap pane left (also shift+j/k/l)
`prefix+z`	zoom
`prefix+r`	resize mode
`prefix+x`	close pane
`prefix+shift+p`	rename pane
`prefix+[`	copy mode (`v` select, `y` copy, `/` search)
`prefix+e`	scrollback in $EDITOR
`prefix+shift+r`	reload config
`prefix+q`	detach

Navigator

prefix+t

NORMAL MODE (VIM_MODE ON)

`j` / `k`	move
`Enter`	open: focus, or create a workspace
`/`	search everything
`w` `a` `p` `q`	filter: workspaces, agents, projects, quick actions
`s` `l` `z` `r`	filter: remotes, sessions, zoxide dirs, roots
same letter	again: back to all sources
`Tab`	cycle source filters
`Esc`	search → normal; normal → close

ANY MODE

`Ctrl+w` / `Ctrl+a` …	switch source, keep typed text
`Ctrl+u`	clear text and filter
`Ctrl+x`	close the workspace matching the item
`Ctrl+b`	pin / unpin item
`Ctrl+o`	toggle preview
`Alt+Enter`	open a dir with the project template
`?`	all keys

SEARCH SYNTAX

`!claude`	agent name
`@idle`	agent status (also @working, @blocked)
`@dot.files`	workspace label
`/dotfiles`	folder path

With nothing typed, the previous workspace is listed first: `prefix+t` `Enter` goes back.

reviewr: scope and view

prefix+d

`u` `b` `t` `g`	scope: uncommitted, branch, last turn, commits
`1` `2` `3`	tab: Changes, All files, PR
`B`	pick base branch
`G`	pick commits
`W`	switch worktree
`|`	unified / side-by-side (137+ cols)
`w`	wrap lines
`m`	rendered / source Markdown
`z`	hide / show file list
`p`	move file list
`<` / `>`	widen / narrow file list
`r`	refresh

MOVE

`j` / `k`	line
`]` / `[`	next / previous change
`f` / `F`	next / previous file
`Ctrl+d` / `Ctrl+u`	half page
`Tab`	switch pane
`/`	search files and code
`Ctrl+f`	find in file
`:`	go to line (`:0` first, `:$` last)

reviewr: comment and send

prefix+d

`v`	select lines
`c`	comment
`e`	edit comment, or open file in Neovim
`d`	delete comment
`n` / `N`	next / previous comment
`l`	list comments
`s`	send all to the agent's input (never submits)
`y`	copy comments
`Esc`	clear selection

COMMENT BOX

`Enter`	save
`Esc`	cancel
`Shift+Enter` / `Ctrl+j`	new line

QUIT

`q`	quit (asks if comments are unsent)
`Q`	quit and drop unsent comments
`?`	all keys

PR tab: `j` `k` move, `o` open in browser. Comments work on deleted lines too.

CLI

`herdr plugin list` — installed plugins

`herdr server reload-config` — apply config changes

`herdr config check` — validate config.toml

`herdr plugin action invoke herdr-navigator.open-side` — Navigator as a side pane

`herdr plugin action invoke herdr-navigator.jump-back` — previous workspace

`herdr integration status` — agent hooks (Claude: current)
